

BRICKFORM® Neutra Clean™

Neutralizer, Cleaner and Degreasing Agent

PRODUCT DESCRIPTION • Neutra Clean is a cleaning and neutralizing agent engineered for use on acid and reactive stained floors prior to sealing and to remove light oil, grease or other types of soils from colored, imprinted and natural concrete surfaces. This product combines cleaning and light degreasing without the use of petroleum solvents and effectively loosens residues from the staining process as well as loosening release powders from stamped concrete.

VOC: <50 grams/liter

USES • Neutra Clean is used as a neutralizer for floors that have been stained with Brickform Blush Tone Acid Stain or E-Stain. Neutra Clean is also used as a light duty cleaner/degreaser for all concrete surfaces and aids in the removal of release powders from stamped concrete.

LIMITATIONS • Neutra Clean is a light duty cleaner/degreaser and neutralizing agent. Deep seeded grease, oil, rust or other stains may need other types of removal processes. Neutra Clean is sold in concentrate form. Before using, test in an inconspicuous area to determine safe and effective dilution ratios for the project.

PACKAGING • Concentrated one gallon units.

COVERAGE • Coverage rates are determined by dilution ratios and will vary depending on the strength needed for a particular project. Recommended dilution rate is 4 oz. of Brickform pH Neutral Cleaner to one gallon of water. Stronger solutions may be necessary on heavily soiled floors.

STORAGE • Do not allow to freeze. Shelf life is 18 months from date of manufacture in original, unopened package.

CAUTIONS • Before using or handling, read the Material Safety Data Sheet and Warranty. DO NOT TAKE INTERNALLY. Do not breathe vapors or mist. Use only with adequate ventilation and use a respirator when levels are above applicable limits. Avoid contact with skin and eyes. Close container after each use. Use good hygiene when handling this product and wash and bathe after each use. Be sure to wash clothing after each use.

APPLICATION • Apply Neutra Clean to the concrete slab and allow the product to dwell for 1-2 minutes. Aggressively scrub the surface and then rinse well with clean water. For interior slabs the use of rotary floor scrubbing machines and wet/dry vacuums are effective. Exterior slabs benefit from aggressive scrubbing with Neutra Clean and pressure washing. Diluted Neutra Clean should be applied at a rate of 150-200 square feet per gallon or as determined during testing.

WARRANTY

This product is not intended for public use and is intended for use by licensed contractors and installers, experienced and trained in the use of these products. It is warranted to be of uniform quality, within manufacturing tolerances. The manufacturer has no control over the use of this product, therefore, no warranty, expressed or implied, is or can be made either as to the effects or as results of such use. In any case, the manufacturer's obligations shall be limited to refunding the purchase price or replacing material proven to be defective. The end user shall be responsible for determining product's suitability and assume all risks and liability.
