

# BRICKFORM® Matte-Magic™

Gloss Reducing Additive

## PRODUCT DESCRIPTION

Matte-Magic is a liquid, field-added, flattening agent additive for BRICKFORM solvent-based sealers. The original topcoat gloss is reduced based on the amount of additive used. The finished gloss reflectance can be varied from semi-gloss to satin.

## ADVANTAGES

- Effectively reduces gloss
- Reduced reflectance helps distinguish floor color
- Liquid Additive is easy to measure and mix
- Additive does not affect viscosity

## Application:

Matte-Magic comes in 8 oz units, each unit is added to a 5 gallon sealer for gloss reduction. If more reduction is desired, a second, third or fourth unit may be added.

Open an 8oz unit of Matte-Magic. Add the 8 oz unit to 5 Gallons of BRICKFORM solvent-based sealer. Once Matte-Magic is added mix the 5 gallons of sealer with a mixer or paint stick. Once mixed, test the sealer for desired look. If desired look has not yet been achieved add a second unit of Matt Magic to the 5 gallons of sealer and remix. A third or Fourth unit of Matte-Magic may be added until desired satin look is achieved. Adding more than four units of Matt-Magic is not recommended.

## WARRANTY

This product is not intended for public use and is intended for use by licensed contractors and installers, experienced and trained in the use of these products. It is warranted to be of uniform quality, within manufacturing tolerances. The manufacturer has no control over the use of this product, therefore, no warranty, expressed or implied, is or can be made either as to the effects or as results of such use. In any case, the manufacturer's obligations shall be limited to refunding the purchase price or replacing material proven to be defective. The end user shall be responsible for determining product's suitability and assume all risks and liability.

## MANUFACTURER

BRICKFORM, A Division of Solomon Colors, Inc.
